Protect Pancha Maha Bhootas for Sustainability

To reduce global warming and go for sustainability “because we have been spewing more than 40 billion tonnes of CO₂ annually into the atmosphere, and polluting it” which is causes a global warming

Abstract

Pancha Maha Bhootas are the main reasons for a life on earth. Keeping them clean and hiegene is our fundamental responsibility. Due to man made mistakes, and non- ecofriendly inventions, and practices, we ar endangering the pancha bhootas. This has an impact on the nature and living beings. Its high time to wake up and protect the god gift forever.

Global warming

Due to the man made mistakes of pollutions with PanchaBhootas, our earth is changing towards a warmer world. The climate change is resulting because of the continuous emission of green-house gases due to the industrialization, transport, energy, lifestyle etc. In the last 400 years after the revolution of industrialization, the ecological disturbance in its balance is rapidly increasing. The effect of Global warming is the Climate change is resulting into an untimely rains, floods, and effect of change of seasons snow in the deserts. UN listed one of the main agenda, a sustainable goals. A platform is needed in bringing in the scholars, research ideas and inventions and innovations on this noble green sustainable platform globally.

The necessity of going green is critical and vital. Global warming is a threat hanging on this planet, due to manmade inventions in the modern technology. A research, practices and educations are necessary amongst the public in order to reduce the greenhouse gases (40 Billion+ tons CO₂ is emitted annually), which causes the global warming. It is evident that every individual on this planet must respect the mother earth. It is a high time for GREEN, Sustainable and Smart education, ideations, research and innovations in professions, Pedagogy (School to universities), services and practices, and homes.

Thus there needs a deeper thought process of Green: Education, ideas, innovations, research and practices the 'PanchaBhoota' for green, clean, peaceful, health and sustainable living. Our ancestors identified the value of Pancha maha bhootas, and practice in Ayurveda, daily life style, and in other activities such as Agriculture, trade etc.

The pancha maha bhootas are:

- ✓ Earth or Prithvi : Healthy farming
- ✓ Water or Jal : Clean water
- ✓ Fire or Agni : Energy
- ✓ Air or Vayu : Clean Air
- ✓ Ether or Akasha : Clear Akash
(Pollution free)
