

### **Criterion: 7.1.2**

**DVV Input/ Comments:** The Geo Tagged photos and supporting bills are not within the assessment year and beyond July 2023 and it appeared that facilities created after July 2023. Please provide supporting documents within assessment year.

**Response:** The institution has undertaken significant efforts in accordance with Criterion 7.12, which have been comprehensively detailed in the Self-Study Report (SSR). It is noteworthy that all of these facilities were established during the assessment year. To substantiate this claim, geo-tagged photos taken within the assessment year have been thoughtfully provided in Table 1 for your reference. Furthermore, in Table 1, we have included corresponding invoices, achievements and impacts of the measures, enhancing the clarity and comprehensiveness of our documentation.

We wish to emphasize that we have already uploaded supporting invoices and relevant activity reports, firmly establishing that these facilities were indeed established within the assessment year. We acknowledge that earlier, the submission of the latest geo-tagged photos might have caused some confusion regarding the timing of these facilities. However, our intention is to demonstrate that these facilities not only were created within the assessment year but also continue to exist and operate effectively. This measure has been taken to underscore the ongoing existence of these facilities.

**To streamline the verification process, we have thoughtfully provided a response Table 2 below, which offers specific page references for your convenience, guiding you directly to the pertinent evidence within the SSR. This approach is designed to enhance transparency and simplify the review process.**

If you require any further clarification or additional documentation, please let us know, and we will gladly provide it.
