From the above data, we can draw the following inferences regarding Gender Equity.

- 1) Overall Faculty Count: The Total Faculty count (Male + Female) has increased over the years, indicating potential growth in the institution's faculty size.
- 2) Female Faculty Count: The Number of female faculty members has remained relatively stable or slightly increased.
- 3) Gender Ratio: While the male faculty count has remained relatively consistent, there has been effort to improve gender equity by increasing the number of female faculty numbers. This can be seen in the gradual increase in female faculty count from 2018-19 (12) to 2022-23 (19).
